Design: AART designers

IGLOO

IGLOO

IGLOO's innovative design provides brand new opportunities to the concept to create a clearly defined meeting and working space in open office environments.

"Space for innovation". This is the idea behind the IGLOO concept, and with modular elements the concept makes it possible to create defined work spaces in open learning environments and open space offices.

IGLOO's hybrid design frames everything from meetings to conferences to study groups, while also offering a unique opportunity to integrate digital media.

IGLOO meets a wide range of needs and may be designed and arranged in different sizes depending of specific requirements, needs and wishes.
